

Ranked **“Best in Product Performance”**
by plastics industry readers in 2003 survey

Purging without **ASACLEAN...**

is like washing dishes without soap.

You don't wash your dishes without soap, so why try to clean your injection molding machine or extruder without purging compound?

ASACLEAN Purging Compound features exclusive **SuperClean Technology** that rids your machinery of contaminants that contribute to resin waste and machine downtime. Plus, it makes

color/resin transitions quick and easy—virtually eliminating the need for cleaning disassembly.
